

## Enabling Business Through Innovation

**Microsoft**  
**GOLD CERTIFIED**

*Partner*

Specialising in application software design, development and deployment Business Net Solutions have established an impressive customer list containing organisations operating across many industry and business sectors ranging in size from corporate companies with hundreds of employees to those with less than ten.

With our considerable commercial and business experience we strive to speak the language of your business and understand your information system requirements. We will rapidly develop and deploy a solution throughout your organisation and provide you with on-going support ensuring the benefits and efficiencies are maximised.

Utilising the best Microsoft database and development tools and integrating with commonly used back-office systems, our products operate using web access resulting in many benefits including: remote access, minimised infrastructure costs and unlimited connectivity along with improving our ability to provide on going enhancements, support and disaster recovery.

Essential to our overall business strategy is that we maintain standards and service levels. We continue to improve internal systems and processes, staff development and training programmes along with our development, deployment and support platforms. We are implementing a Quality Management System as defined within ISO 9000.

We are proud of our proven track record for bringing projects in on time and within budget but just as importantly delivering real tangible benefits and efficiencies across your business.
